► Willett's Custom Building, Inc.

Willett's Custom Building, Inc. has been helping to build Kittitas Valley one home at a time for over 40 years. Willett's Custom Building is a second generation home builder that originally began with Farrell Willett. Farrell's reputation for quality homes is only surpassed by the knowledge, principles and understanding of the trust customers put in our hands when we build their dream home. Dave has been managing the company for the last 13 years, and he strives to make each building experience, a pleasant one. Dave has made Farrell proud by maintaining the extraordinary quality Willett's has always put in every home.

With a dramatic view and more than 2,900 square feet of living space, these qualities combine to create the owners dream home. Unique home features include dramatic cathedral ceilings that heighten the opening of the living room, and a fireplace in the master suite. Porches also flank the living room, and the rear wall of windows provides uninterrupted views of the outdoors. The master suite on the main floor is topped by a tray ceiling and a walk-in closet as well. The master bath has a fantastic walk-in shower with a digital control system so each individual can set their preferred temperature. The shower's custom tile work completes the master suite, and was completed by Cody Willett Custom Tile. A versatile bedroom/office and full bath are also nearby. Downstairs are two additional bedrooms with a covered patio, another full bath and a generous entertainment room with a fireplace.

Dewil cabinets from Premier Paint and Floor Covering grace the kitchen and pantry, and are complemented with GE appliances from Shaw's Furniture and Appliances. Waterline Creations added their special touch with slab granite countertops for the kitchen, master bath and fireplace hearths. A Touch of the West has generously staged spectacular pieces that add a personal touch and warmth to the home.
